Dear Mark,

RE: REGIONAL ROAD GROUP FUNDING

Lake Grace Shire is part of the Wheatbelt South Regional Road Group, which we share with four other shires.

Being the largest of the regions shires, Lake Grace manages an asset just over 2,200 km of running surface. This relates to considerable higher running costs than other members of the group.

The Metrocount Classification System has proved to be a vital tool in any road management decisions, and recently assisted us in securing over \$270,000 in grant funding for our region.

The Metrocount System has also given us the opportunity to analyse traffic and build a clear picture of vehicle movement throughout the area.

Yours sincerely,

P.T. WEBB
