

MetroCount[®]

Traffic Survey Services (UK)

MetroCount designs, manufactures, and supports world-leading traffic monitoring systems used in over 135 countries.

Our UK survey team now delivers end-to-end traffic surveys for councils, consultants, and agencies - from single-site studies to large-scale monitoring programs.

Our Services

Automatic Traffic Counts (ATC)

- Global leader in automatic traffic monitoring
Thousands of ATC surveys conducted annually using RoadPod[®] systems
- Full-service delivery; site selection, installation, monitoring, and data validation
- **We Provide:**
 - Vehicle counts, speeds, and classifications
 - Data for performance assessment, modelling, and safety planning

Manual Classified Counts (MCC)

- High-definition CCTV surveys
- Footage reviewed and coded for accurate datasets
- **We Measure:**
 - Turning and link counts
 - Pedestrian and cyclist movements
 - Queue lengths, saturation flow, parking activity, and journey times
- **Supports:**
 - Congestion studies
 - Intersection design and optimisation
 - Sustainable transport planning
